Teleworking: Employees not currently required to be on campus may continue teleworking through September 10. Employees who prefer to work from campus sooner than September 10 are encouraged to do so, as long as it is safe and operationally feasible.

As we prepare to return to in-person working and learning this autumn, it may be operationally necessary to call additional employees back to onsite work prior to September 10. In cases where an employee has been teleworking but is now needed in person to support operations, units must provide employees with 30 days' notice for reporting back to work in person. Exceptions can be made for emergencies and in accordance with relevant collective bargaining agreements.

Staff telework arrangements after September 10 should follow autumn [return to onsite work guidance](#).
