GENERAL BIOLOGY BACHELOR OF ARTS IN BIOLOGY

The **BA Degree with an option in General Biology** is designed for students who desire a breadth of training throughout their program of study. Compared to the BS degree, the BA does not require physics or a third quarter of organic chemistry. This is an ideal program for students wishing to get the scope of the biological sciences without some of the supporting science sequences. It's not recommended for most of those interested health professional programs after graduation.

Each option is complemented by the College of Arts and Sciences general educational requirements such as English Composition, Writing, Foreign Language, QSR, VLPA, and I&S.

Biology Department Admission Requirements

This competitive admission process is designed not to limit access to the major but to assist students in careful planning and preparation for success in the Biology Major. An electronic application can be found on the biology website and will be due the second Friday of Autumn, Winter, Spring, & Summer quarters by 11:59pm.

To apply for a Biology Major, you must meet these minimum application requirements:

- 1. Be a matriculated student at the UW Seattle Campus and in good academic standing.
- 2. Complete the Introductory Biology series or equivalent courses to UW BIOL 180, 200, 220 and have a minimum grade of 2.0 in EACH course.
- 3. Have a minimum 2.5 Cumulative GPA for any supporting Chemistry, Physics, Math, Biology or other courses intended for use in the biology major that are complete at the time of application.

<u>Meeting these minimum requirements does not guarantee admission to the Biology major</u>. Other factors in admission include review of essay questions, space availability in the major, and time to degree set by UW Satisfactory Progress Policy. We strongly encourage students who do not meet the minimum application requirements to meet with a Department of Biology Academic Adviser to discuss their options. If you plan to pursue a double major or degree, a detailed plan for all requirements is required upon admission.

Must be a UW address

Departmental Honors in Biology

Departmental honors allow students seeking extra challenges and opportunities to do so while completing a Biology Degree. Students may request an invitation to departmental honors in Biology once they and have been admitted to the Biology Major. The request <u>must</u> be submitted <u>3 quarters</u> prior to graduation; requests made later will not be reviewed. *More details about honors can be found in Section VIII.*

Major Requirements. A minimum of 90 credits to be distributed as follows:

I. INTRODUCTORY BIOLOGY:

(15 credits)

(15-23 credits)

(9-10 credits)

BIOL 180, 200 220 (5,5,5)

CHEM 152, 153 or 220 can be a co-requisite of 200

Statistics (381,311 or BIOST. 310) and Calculus (124 or 291)

Calculus with Analytic Geometry

Quantitative Statistical Reasoning

Calculus for Biologists

Hybrid Chem Series

II. SUPPORTING COURSES IN CHEMISTRY AND MATHEMATICS:

Chemistry (Select one option):

- 1. CHEM 120.220.221 (5.5.5)
- 2. CHEM 142/143, 152/153 (5,5) and 223, 224 (4.4)
- 3. CHEM 142/143, 152/153, (5,5) and 225, 224 (4,4)142/143, 152/153, 162 (5,5) and 237, 238 (4,4)
- 5. CHEM 142/145, 152/155, 162(5,5,5) and 257, 256

Standard Chem/Short Org Chem Standard Chem, Long Org Chem

Mathematics (choose one option):

1. MATH 124, 125 (5,5)

III.

2

- 2. QSCI 291, 292 (5,5)
- 3. QSCI/STAT 381/311, 482 (5,5)
- 4. Combine1 Stats and 1 Calculus class (4/5,5)

GENETICS REQUIREMENT:

0 11

0 1

(3-5 credits)

	Select one	of the fo	ollowing courses:	
1.	GENOME	361	(3)	Fundamentals of Genetics and Genomics
2.	GENOME	371	(5)	Introductory Genetics (Autumn only)
3.	BIOL/FISH	340	(5)	Genetics and Molecular Ecology
-				

IV. LAB, RESIDENCY AND 400 LEVEL BIOLOGY REQUIREMENTS:

These requirements may overlap with other requirements such as Breadth, Natural History/Biodiversity, and/or Advanced Electives.

- <u>**Two**</u> laboratory courses at a minimum.</u> Two course numbers marked with "L" which may overlap with natural history and/or advanced electives. If using research to cover one lab, then a minimum of four credits of 499 (*please read approval process in end notes*) can substitute for only one laboratory.
- *15 credits* must be 400 level with the <u>BIOL</u> department prefix. Courses such as Biochemistry (BIOC) and Microbiology (MICROM) are from other departments and *will not* count toward this requirement.
- 15 credits of 300 and 400 level **BIOL** Electives must be taken in residency at the <u>University of Washington-Seattle</u> campus. *This requirement can overlap with the departmental 400 level requirement above*.
- A cumulative GPA of a 2.0 is required for all classes used toward the major and are taken at the University of Washington.
- Only 15 credits in your last 60 credits can be taken outside of the UW-Seattle campus.

V. TAXONOMIC BREADTH REQUIREMENT:

Biologists often concentrate on one level of biological organization, but it is important to know about broader biological topics that can be studied. To broaden your perspective, you are required to take at least one biologically based course that provides taxonomic breadth outside the Animalia Kingdom; you must take one asterisked (*) course (*from any of the lists on this handout*) which can be shared with either your Natural History/Biodiversity requirement or an Advanced Elective.

VI. NATURAL HISTORY/BIODIVERSITY:

(3 credits)

Natural History is the study of the characteristics, life cycles, and biological background of a particular taxonomic group. Biodiversity deals with a whole suite of organisms that inhabits a particular environment. These classes are often field oriented, in which students both observe and/or analyze both the organisms and their interactions in their natural habitats.

Select one course: Natural history is a separate requirement from your Advanced Electives.

BIOL	280	(4)	The History of Life
BIOL/FISH	311L	(5)	Biology of Fishes
BIOL/ESRM	331	(3)	Landscape Plant Recognition*
BIOL/FHL	430L	(5)	Marine Zoology (FHL)
BIOL/FHL	432L	(9)	Marine Invertebrate Zoology (FHL)
BIOL	433L	(5)	Marine Ecology
BIOL	434L	(5)	Invertebrate Zoology
BIOL	438L	(5)	Analytical Paleobiology
BIOL	439L	(5)	Functional Morphology
BIOL	441L	(5)	Trends in Land Plant Evolution*
BIOL	443L	(5)	Evolution of Mammals and Their Ancestors
BIOL	444L	(5)	Ornithology
BIOL/FHL	445L	(5)	Marine Botany* (FHL)

ESRM	435	(3)	Insect Ecology
FISH	310L	(5)	Marine Invertebrate Diversity
FISH	450	(3)	Salmonoid Behavior and Life History

VII. ADVANCED BIOLOGY ELECTIVES:

(42 credits)

• You are required to have a minimum of <u>42 credits</u> from the selection below. Within these 42 credits students must select one course from at least three out of the five areas:

1. Biology and Society Course Electives:					
BIOL	305	(3)	Science Communication: Video Storytelling in Biology		
BIOL	359	(3)	Foundation of Quantitative Biology		
BIOL/BIO A	385/355	(3)	Evolutionary Medicine and Public Health ⁴		
BIOL	396	(1-4)	Peer Facilitation in Biology ¹		
BIOL	419	(4)	Data Science for Biologists		
BIOL/PSYCH	458	(4)	Behavioral Genetics		
BIO A	351	(5)	Principles of Evolutionary Medicine & Public Health ⁴		
ENV H	311	(3)	Introduction to Environmental Health		
ENV H	444	(4)	Antibiotic Resistant Bacteria and Genes		
ESRM	465	(3)	Economics of Conservation		
ESRM	470	(5)	Natural Resource Policy and Planning		
GENOME	475	(3)	Debates in Genetics		
GWSS/PSYCH	357	(5)	Psychobiology of Women (Registration is restricted through Psych)		
BH	311	(3)	Ethical Issues in Modern Medicine		
BH	402	(5)	Ethical Theory		
BH	404	(5)	Metaethical Theory		
BH	421	(5)	History of Eugenics		
BH	444	(3)	Ethical Implications of Emerging Biotechnology		
BH	488	(3)	Global Perspectives in Bioethics		
PGH	301	(5)	Introduction to Genetic Epidemiology		
PSYCH	300	(5)	Animal Behavior		
PSYCH	419L	(5)	Behavioral Studies of Zoo Animals		

Page 3 of 8

2. Ecology and Evolution/Systematics Course Electives:					
BIOL	315	(3)	Biological Impacts of Climate Change		
BIOL	354	(3)	Foundations in Evolution and Systematics		
BIOL	356L	(3)	Foundations in Ecology		
BIOL	406	(3)	Conservation of Large Vertebrates		
BIOL	423	(3)	Marine Ecological Processes		
BIOL/ESRM	424/478L	(5)	Plant Eco-Physiology*		
BIOL	433L	(5)	Marine Ecology		
BIOL	468L	(4)	Ecology of Animal Movement		
BIOL	469	(3)	Evolution & Medicine		
BIOL	472L	(5)	Community Ecology*		
BIOL/FISH	473/474L	(3/2)	Limnology* & Lab		
BIOL	476	(3)	Conservation Biology*		
BIOL/FISH/ENVIR	478	(3)	Topics in Sustainable Fisheries		
BIOL	480L	(4)	Field Ecology		
BIOL	481L	(5)	Experimental Ecology and Evolution*		
BIOL	483	(1)	Sr. Seminar in Paleobiology		
BIOL	486	(1-3)	Senior Seminar in Ecology		
BIOL	489	(1-3)	Sr. Seminar in Plant Biology*		
ESRM	250	(5)	Introduction to Geographic Information		
ESRM	325	(3)	Environmental Application of Plants*		
ESRM	350	(5)	Wildlife Biology and Conservation		
ESRM	400	(3)	Natural Resource Conflict Management		
ESRM	411	(3)	Plant & Propagation: Principles and Practice*		
ESRM	412	(3)	Native Plant Production*		
ESRM	415	(5)	Terrestrial Invasion Ecology*		
ESRM	430	(5)	Remote Sensing in the Environment		
ESRM	450	(5)	Wildlife Ecology and Conservation		
ESRM/FISH	457/455L	(3/5)	Fish and Wildlife Toxicology		
ESRM	458	(5)	Mgmt. of Endangered, Threatened, and Sensitive Species		
FISH/ENVIR	330	(5)	Climate Change Impacts on Marine Ecosystems		
FISH	406L	(5)	Parasite Ecology		
FISH	444L	(5)	Conservation Genetics		
FISH	464	(4)	Arctic Vertebrate Ecology		

3. Molecular, Cellular	3. Molecular, Cellular, and Developmental Biology Course Electives:						
BIOL	302L	(4)	Laboratory Techniques in Cell and Molecular				
BIOL	355	(4)	Foundations in Molecular Cell Biology				
BIOL	380	(3)	Biomedical Advances and Society				
BIOL	400L	(4)	Experiments in Cellular Biology				
BIOL	401	(4)	Current Topics in Cell and Developmental Biology				
BIOL	402L	(4)	Functional Genomics				
BIOL	403	(4)	Knowledge Synthesis in Cell Biology				
BIOL	405	(3)	Cell and Molecular Biology of Human Disease				
BIOL	407	(4)	Stem Cell Biology				
BIOL	411	(4)	Developmental Biology				
BIOL	412L	(4)	Developmental Biology Lab				
BIOL	415	(3)	Evolution & Development				
BIOL	416	(3)	Molecular Genetics of Plant Development*				
BIOL	436	(3)	Molecular Parasitology*				
BIOL	442	(3)	Genetics of Plant Innovations*				
BIOL	455	(4)	Human Immunology & Pathology of Infectious Diseases				
BIOL	457	(4)	Chemical Communication				
BIOL	459	(3)	Developmental Neurobiology				
BIOL	464	(2)	Molecular Mechanisms of Cancer Seminar				
BIOL	485	(2)	Sr. Seminar in Molecular, Cellular & Dev. Biol.

5. Natural History/Biodiversity

Any additional course(s) from the Natural History/Biodiversity list after the initial requirement is completed.

Notes on next page...

IT IS YOUR RESPONSIBILITY TO REGULARLY ASSESS YOUR DEGREE PROGRESS BY REFRESHING AND CHECKING <u>YOUR DEGREE AUDIT</u>. SHOULD YOU HAVE A QUESTION OR NOTICE A DISCREPANCY, IT IS YOUR RESPONSIBILITY TO ADDRESS THIS WITH A DEPARTMENT OF BIOLOGY ACADEMIC ADVISER.

For scheduling future classes:

- Many elective courses have pre-requisite courses, check the catalog.
- In planning your courses, be sure to use the course catalog and matrix to plan schedules that include the necessary pre-requisites, so you are able to register for your chosen selections!

VIII. DEPARTMENTAL HONORS REQUIREMENTS

Contact Janet Germeraad, janetjg@uw.edu with questions about the requirements and application

General Requirements for completing Departmental Honors include:

- Applying for Departmental Honors 1 year prior to graduation.
- UW Cumulative GPA: 3.3 and a Major Cumulative GPA: 3.4
- Complete two 400 level BIOL courses for Ad Hoc credit (*Requires online agreement form*)
- Complete two approved Senior level BIOL Seminars
- Complete 9 credits of Undergraduate Research (*Research approval form required*)
- Complete a research paper based on approved research credits by the start of the final quarter
- Present your research work at the Undergraduate Research Symposium or other approved venue

IX. ADDITIONAL NOTES:

- Undergraduate Research: Any 499 credit *must* be approved by petition; see a Biology Adviser or visit the website for a Research Approval Form. A minimum of 4 credits on the same project are required for a petition to count towards a lab.
- **Experiential learning:** A maximum of 10 credits of a combined *381/382/383/396/399/498/499* can be applied to your degree. You will need a faculty code from your faculty sponsor to sign up for any of these credits.
- BIOL seminars, 496, and 497 are variable topic courses and will vary how and if they count for degree requirements. Quarterly information on how they apply is sent through the listserv.
- Courses listed in more than one area category can only count for one area requirement.
- **Cross Campus equivalencies are not guaranteed for BIOL 180/200/220 registration purposes.** Complications may arise during registration if you have taken courses at other campuses and it is up to the student to inquire and be prepared. You will need to submit a petition for any other courses from the other campuses.
- For other classes of interest that are not listed, please contact an advisor about the possibility of petitioning. *The course will need to be at the <u>300 to 400 level</u> and have a biological basis to be considered.*

X. SYMBOLS

- * Indicates course with non-animal emphasis to meet **taxonomic breadth** requirement of the General Biology Option.
- [#] Indicates a class that has a lecture only (3 credits) or a lecture and lab component (5 credits) (*FHL*) Indicates course taught at Friday Harbor Labs
- ¹ 396 is regulated and administered by professor permission. To Peer facilitate an introductory course, contact lab coordinator of the specific class. For other courses, prior experience with the class and permission of acting instructor is necessary for enrollment
- ² Only 1 class per pair can count as an elective from 405/440 and 406/441
- ³ Credit can only be received for one course BIOL 413 or NURS 301 due to content overlap
- ⁴ Credit can only be received for one course BIOL 385 or BIO A 351 due to content overlap

Remember!

- You're in charge! Take responsibility for your education by understanding your degree requirements. Reflect on the course choices available to you. Will your courses help you in preparation for a career or do they teach skills? Will they allow you to explore your interests or equip you for graduate or professional schools?
- Explore the course choices prior to an academic planning session or walk-in drop-in session. Ask fellow biology majors what courses they have enjoyed. Read the course descriptions on the course catalog. To make your advising appointment beneficial, advisors will need an idea of content that interests you and why.
- If you want to know if you're "on track" or will graduate "on time", you will need to create a full academic plan to be reviewed during an advising appointment. By developing your plan, you'll be able to develop a sense of how much time it will take to complete your degree requirements.
- Do you plan on incorporating service learning? A study abroad program? Internships or volunteer experience? How will that fit with your academics and which opportunities are best for you? Your education goes beyond just what courses you take.
- Biology Student Services are available to assist in many ways. Come visit Hitchcock 318 Academic Services Office.

Speaking of Study Abroad!

- Do you know that UW as an entire office dedicated to sending you to study across the globe?
- There are several programs that might fit your needs! Wants to be gone a quarter. An entire year? Just three weeks? No problem, there are options!
- Work with the Study Abroad in 459 Schmitz Hall as well as a biology advisor to ensure you choose a program which meets your educational goals and academic plans. There are limited departmental options associated with BIOL, so direct exchanges or external programs are your best bet.
- Visit <u>https://www.washington.edu/studyabroad/</u> to get started!

Getting Involved

- Research is one of the best ways of applying what you are learning in classes to real world situations. You can use the Undergraduate Research Program (URP) <u>http://www.washington.edu/undergradresearch/</u> to find open positions or you can contact a faculty whose research interests you directly. Check the Research Symposium that happens every May in Mary Gates to see what students are doing throughout campus!
- Did you know that there are over 700 registered student organizations (RSO)? Find one that suits you, or if you can't find one, create one! <u>https://huskylink.washington.edu/</u>
- Check in the with Carlson Center and Public Service Center in MGH 171 for service learning and volunteer opportunities.
- Want to gain some hands-on experience? Consider an internship. <u>https://careers.uw.edu/</u>
- Think about other ways to connect your academics to exploring careers! Volunteering, job shadows, informational interviews, etc.

The Career Center

- Concerned about Careers for your specific major? The UW Career Center is located in MGH 134!
- The Career Centers counselors are available for one-on-one appointments, resume editing, and they host several workshops each quarter on how to make a resume, how to apply to graduate school, preparing for interviews for jobs and professional schools and more!
- Check out the Career Center website: <u>https://careers.uw.edu/</u>
- Think about other ways to connect your academics to exploring careers! Volunteering, job shadows, informational interviews, etc.
- Use Handshake to look for jobs and opportunities: <u>https://careers.uw.edu/</u>

Course	Cr	Course	Cr	Course	Cr	Course	Cr
Quarter		Quarter		Quarter		Quarter	
Total		Total		Total		Total	

Goals, Courses, Ideas:

Freshman Year Goals:

Explore Majors! Get Involved!

- Meet with advisers in various departments or UAA.
- Join a student club, participate in tutoring/study groups
- Volunteer
- Create a pattern of attending office hours of your professors and TA's
- Investigate undergrad research, internships and/or study abroad.

Sophomore Year Goals:

Be more focused.

- Meet with Dept. advisors in majors you are most interest in
- Find a mentor (upper level student, professor or professional)
- Investigate professional exams: GRE, PCAT, DAT, MCAT
- Pursue undergrad research
- Create and refine your Resume or C.V.
- Start doing informational interviews

Junior Year Goals:

Define and Clarify Future Goals

- Develop your leadership by being a campus leader or club officer
- Identify 2 faculty members who can recall your name
- Evaluate and assess strengths and weaknesses in your resume
- Consider whom you would like a letter of reference from
- Review your progress on your freshmen and sophomore goals

Senior Year Goals:

Wrap up and Final Activities

- Use the career center to create your resume/C.V. and various alternative versions.
- Participate in some mock interviews
- Begin your job hunt or applications for grad programs
- Gather your persons for your letters of rec
