

PHYSIOLOGY

BACHELOR OF SCIENCE IN BIOLOGY

The *Physiology* option emphasizes physiological processes from cellular to organismal levels. This is an attractive option for students interested in the internal processes of both animals and plants in relation to the systems and components that create a working living organism.

Each option is complemented by the College of Arts and Sciences general educational requirements such as English Composition, Writing, Foreign Language, QSR, VLPA, and I&S.

Biology Department Admission Requirements

This competitive admission process is designed not to limit access to the major but to assist students in careful planning and preparation for success in the Biology Major. An electronic application can be found on the biology website and will be due the second Friday of Autumn, Winter, Spring, & Summer quarters by 11:59pm.

To apply for a Biology Major you must meet these minimum application requirements:

1. Be a matriculated student at the UW Seattle Campus and in good academic standing.
2. Complete the Introductory Biology series or equivalent courses to UW BIOL 180, 200, 220 and have a minimum grade of 2.0 in EACH course.
3. Have a minimum 2.5 Cumulative GPA for any supporting Chemistry, Physics, Math, Biology or other courses intended for use in the Biology major that are complete at the time of application.

Meeting these minimum requirements does not guarantee admission to the Biology major. Other factors in admission include review of essay questions, space availability in the major, and time to degree set by UW Satisfactory Progress Policy. If you did not earn a 2.0 in each of your Biology Intro courses and a cumulative GPA of 2.5 in prerequisite course work needed to apply to Biology, or if you have academic issues to explain that are larger than a single course or quarter, please see an academic adviser to address these issues prior to application. If you plan to pursue a double major or degree, a detailed plan for all requirements is required upon admission.

Departmental Honors in Biology

Departmental honors allow students seeking extra challenges and opportunities to do so while completing a Biology Degree. Students may request an invitation to departmental honors in Biology once they have been admitted to the Biology Major. The request **must** be submitted 3 quarters prior to graduation, requests made later will not be reviewed. *More details about honors can be found in Section VII.*
