

From Eye to Insight

Histological section from cat eyes. Simultaneous spectral (grey) and FLIM (color) confocal imaging reveals contrast by lifetime. Acquisition and visualization using SP5 FALCON and LAS X software.

CONFOCAL IMAGING DEMO: TCS SP8 SYSTEM STED 3X, FALCON (FLIM), LIGHTNING & FCS

- **FALCON:** the future of functional imaging. FRET, fluorescence lifetime, metabolic imaging and more at 10x faster than conventional systems.
- **LIGHTNING** super-resolution **down to 120nm**.
- **FCS** data acquisition with up to 4 Hybrid Detectors (HyD) simultaneously.
