

# Postdoc Symposium Biology Seminar

Monday, October 21, 2019 | 12:00pm  
HCK 132 Refreshments at 11:45am

## Neuromodulation and Differential Learning Across Mosquito Species

By: Dr. Gabriella Wolff (Riffell Lab)

## Moonlight modulates sleep in communities with limited access to artificial light

By: Dr. Leandro Casiraghi (de la Iglesia Lab)

## Foraging decisions in uncertain environments: Do bumblebees have FOMO (fear of missing out)?

By: Dr. Callin Switzer (Daniel Lab)

## The interacting effects of climate change and urbanization of Threespine Stickleback evolution

By: Dr. Simone Des Roches (Alberti Lab)

*Full abstract information posted on the UW Bio Website under Seminars.*

Hosted by: Clemens Cabernard, Associate Professor
